Summary

Experienced Java Developer with 2 years of expertise in Java and Spring Boot, specializing in financial and banking projects. Adept at JavaScript and its technologies, including React and NodeJS, Proficient in SQL, and tools like GitLab. Committed to delivering robust and efficient solutions in Agile environments. Eager to collaborate with teams to deliver solutions that meet the needs of end-users and drive business success.

Professional Experience

Senior System Engineer | Infosys Limited, Indore
Project Domain - Banking Sector (Finacle)

April 2022- present

❖ Roles and Responsibilities -

- Involved in the various phases of Software Development Life Cycle like Requirement gathering, Analysis and code development.
- Enhanced project functionality by developing and maintaining efficient RESTful services.
- Developed and maintained web applications using Java and Spring Boot, following best practices and coding standards.
- Regularly update and maintain JIRA tickets, providing detailed explanations of issue resolutions and ensuring accurate documentation of the development process.
- Actively involved in the implementation of Content Security Policy (CSP) in the Alerts module, ensuring a secure web application environment.
- Seamlessly integrated front-end components, JSP, JavaScript. HTML5, ReactJS to deliver a cohesive and user-friendly interface.
- Utilized Git for version control and NodeJS for server-side scripting.
- Participating in agile development processes, such as sprint planning, stand-up meetings, and retrospectives.
- Interacted with Java controllers like JSON to write/Read data from Back-end System.
- Demonstrated proficiency in Finacle and actively contributed to Finacle customization.

❖ Projects:

Wealth Management System - Risk Profiling:

- Led and directed a team of 4 professionals, ensuring precise and timely delivery of project milestone, enhancing overall project success.
- Designed and developed RESTful APIs for various menus using Spring Boot, aligning with specific requirements

- End-To-End Development of dynamic web pages using Wavemaker software, ensuring compatibility and flexibility for seamless customizations.
- Collaborate with other module leads to ensure seamless integration of modules and alignment with project goals
- **Tech Stack:** Wavemaker, JavaScript, Java, Spring boot, REST APIs, Spring JPA, MySQL.

Payments Module:

- Created messaging methods for translating data received by the Message Hub Microservice.
- Developed REST APIs using Spring Boot to collect user-entered data during account creation and stored the details in the database with the JPA ORM tool.
- Provided technical support to the testing team for integration testing.
- Identified and resolved JIRA-reported issues, implementing timely fixes to enhance module stability and performance.

Tech Stack: Java, Spring boot, REST APIs, Spring JPA, MySQL.

Skills

- Languages : Java, JavaScript, ReactJS.
- Frameworks : Spring, Spring boot, Spring JPA, ExpressJS.
- Database : MySQL.
- Softwares : Wavemaker, VsCode.
- DevSecOps Tools : Git, Github.
- Certifications: AZ-104, Infosys Certified Spring Associate.

Personal Live Project

msuggest.com - New Movies/Tv series suggestion Every day! (Team of 2)

Roles and Responsibilities -

- Developed the backend for msuggest.com, using spring boot.
- Implemented efficient data transfer between the database and website using Spring JPA.
- Designed and maintained RESTful APIs to support dynamic content and user interactions.
- Ensured high performance and responsiveness of the website through optimized BE processes. Project Link - <https://msuggest.com/>

Tech Stack: NextJS, Java, Spring boot, Spring JPA, MySQL.
